## Estimating Weight Worksheet

Fill in the blanks with reasonable units of weight. (either g, kg, lb, or oz.)

Dad got a package in the mail that weighed 900 \_\_\_\_\_. It had some magazines in it.

To find the answer we will need to look at the question carefully, what item is present in the mail that dad got?

There are some magazines in it. Estimate how heavy these are?

We will find the unit that best approximates the items we have.

Here we estimate that a package of some magazines can weigh 900 grams not 900 kgs nor 900 lbs or oz.

Answer:

Dad got a package in the mail that weighed 900 grams. It had some magazines.

### Practice Problems

1	Angel got a package that weighed 250 _____. It had some chocolates.
2	Bob bought a pencil that weighs 1 _____.

(Note: Sometimes more than one right answer is possible.)

Name \_\_\_\_\_

Date \_\_\_\_\_

## Answer Key

(Note: Sometimes more than one right answer is possible.)

1 Grams(g)     2 Ounce (oz)
